Drawer units / Armoires à tiroirs

Drawer units

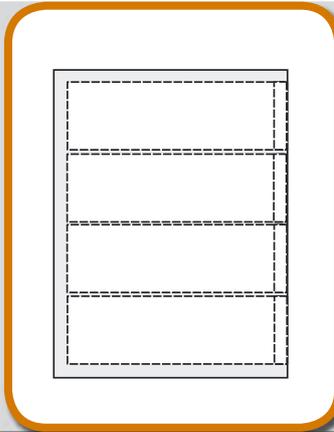

Armoires à tiroirs

The drawer units have a sheet metal carcass with a cut-through design to minimise weight and can be fitted with various drawer sizes. On 507 mm wide models, it is possible to fit trays, instead of drawers, for stowing away Syncro tool boxes.

Les armoires à tiroirs Syncro sont formées par un meuble en tôle, allégé de façon adéquate pour réduire au maximum son poids, à l'intérieur duquel on peut introduire des tiroirs de différentes mesures. Pour les modèles de 507 mm. de largeur, à la place des tiroirs, on peut installer des plateaux de support pour loger les valises Syncro.

News:

Syncro drawer units are provided with a new flush handle so that the front panels are free of jutting out parts.

Nouveauté:

Les armoires à tiroirs Syncro sont actuellement munies de poignées à encastrement, qui permettent d'éliminer toutes les parties saillantes sur la façade.

All drawer units are provided with an automatic dual locking system: once the drawer has been pushed back it automatically locks in the closed position.

Tous les tiroirs sont équipés de double arrêt de fermeture automatique: simplement en fermant le tiroir, celui-ci s'accroche automatiquement.

Plastic containers for drawers / Casiers en plastique pour tiroirs

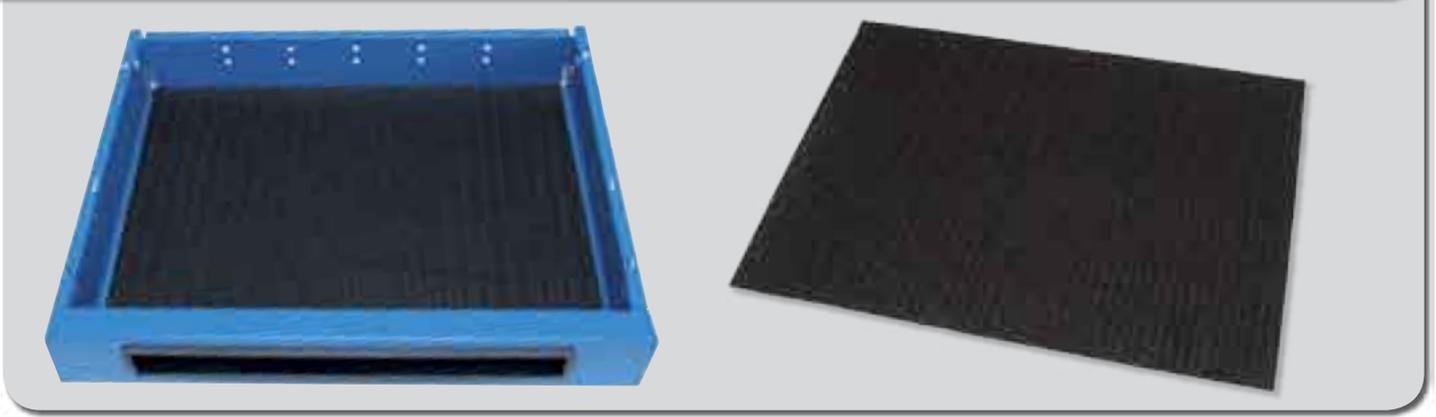

Plastic containers for drawers are available in 5 sizes and fit all 66 mm high drawers.

Thanks to the modular design, you can arrange these containers on the inside of the drawers to specific requirements.

Les casiers en plastique pour tiroirs sont disponibles en 5 dimensions modulaires pour remplir parfaitement tous les tiroirs avec h. 66 mm. Grâce à la modularité parfaite, il est possible de modifier la combinaison des casiers à l'intérieur du tiroir selon les propres exigences.

Revolutionary anti-slip rubber mats / *Petits tapis révolutionnaires en caoutchouc antidérapant*

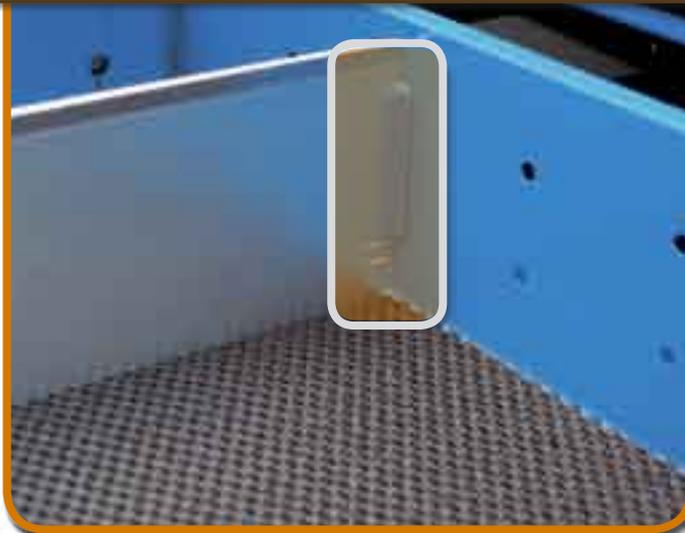

This product offers a number of advantages:

- 1.** Weighs 85% less compared to conventional rubber mat.
- 2.** Excellent mechanical resistance thanks to the high-resistant nylon threads embedded in the rubber.
- 3.** Resistant to oil, chemical products and UV rays.
- 4.** High non-slip surface which means the hardware and tools stowed in the drawers move less with the van in transit.
- 5.** Machine washable.

Il s'agit d'un produit qui garantit une série d'avantages:

- 1.** *Poids inférieur de 85% par rapport au caoutchouc traditionnel.*
- 2.** *Excellente résistance mécanique, grâce aux fils en nylon à résistance élevée noyés à l'intérieur.*
- 3.** *Faible sensibilité à l'huile, aux produits chimiques et aux radiations solaires.*
- 4.** *Adhérence superficielle très élevée, ce qui signifie que le matériel transporté à l'intérieur des tiroirs se déplace beaucoup moins pendant le transport.*
- 5.** *Lavable en machine.*

Innovative divider with secure in place system / *Innovant système de blocage pour tiroirs*

- 1.** Thanks to the innovative secure in place system, no more problems with vibrating or loose dividers!
 - 2.** All drawer dividers are provided with our new and exclusive secure in place system.
 - 3.** By simply pressing gently the two tongues at the base of the divider with the tip of a screwdriver, you can secure the divider in place simply and efficiently. Whenever necessary, to remove or move the divider straighten the two tongues.
- 1.** *Grâce au système de blocage exclusif, le problème des cloisons qui vibrent ou qui sortent de leur logement n'existe plus!*
 - 2.** *Toutes les cloisons des armoires à tiroirs sont dotées de série du nouveau système de blocage exclusif.*
 - 3.** *Simplement en déformant légèrement avec la pointe d'un tournevis les deux languettes à la base de la cloison, on peut bloquer les cloisons de façon simple et efficace. On peut toujours enlever ou déplacer la cloison simplement en redressant les languettes.*

Drawer units with trays for stowing tool boxes / *Armoires à tiroirs avec plateaux pour valises*

Syncro drawer units can be provided with drawers (incl. dividers and mats) or trays for stowing tool boxes.

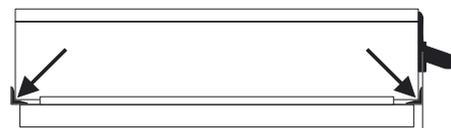

The telescopic slides allow you to pull out the drawer providing greater depth and access whereas the tool boxes can be opened without removing them off the tray or, when necessary, these can be taken and carried directly on site.

Les armoires à tiroirs Syncro peuvent contenir non seulement des tiroirs avec cloisons et tapis mais également des plateaux pour loger les valises. Grâce aux guides télescopiques, qui garantissent une sortie du tiroir majeure par rapport à la profondeur de celui-ci, les valises peuvent être ouvertes complètement sans être extraites du plateau, ou être prélevées et transportées sur le lieu de travail.

Anti-wearing plastic stoppers for case trays / Bouchons anti usure pour plateau porte valises.

New: case trays are now provided with soft plastic anti-wearing stoppers, that eliminate rubbing between case and tray thus avoiding rattling and painting tear.

Nouveau: les plateaux porte valise sont dorénavant fournis avec des bouchons anti usure en plastique souple, afin d'éviter les frottements de la valise et donc d'éliminer les bruits et usure de celle-ci.

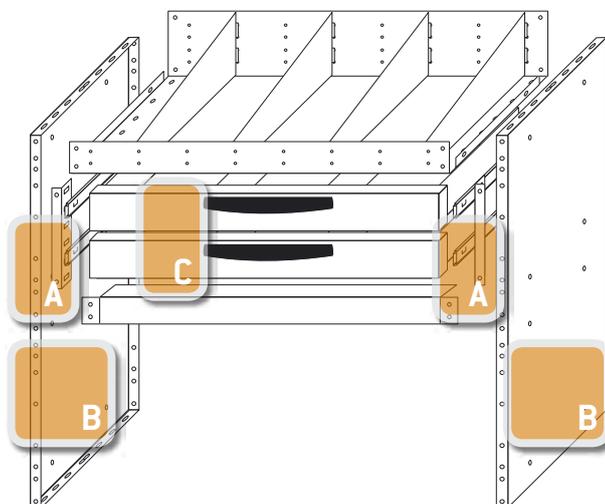

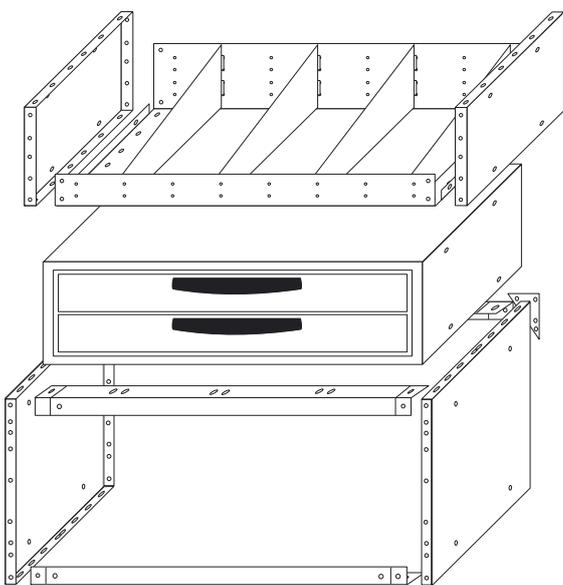

Drawers fitted to side panels / Tiroirs appliqués latéralement

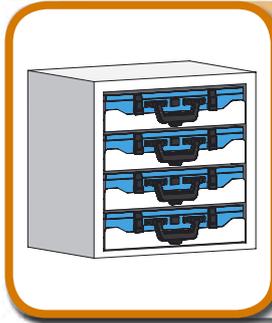

Drawers can be fitted to drawer unit cabinet or to side panels.

In the second case, the drawers are mounted by means of four adaptor **A** fixed on 2 side panels **B** the drawers **C** are then installed as if mounted in a drawer unit cabinet.

Les tiroirs peuvent être appliqués non seulement à l'intérieur des armoires mais également latéralement. Dans ce cas, le montage s'effectue à l'aide de quatre adaptateurs **A** qui sont appliqués sur les deux côtés **B** en permettant ainsi le montage des tiroirs **C** selon les mêmes modalités d'application que pour l'armoire.

Drawer units with transparent removable drawers

Thanks to the transparent drawers, Syncro drawer units are the ideal solution for stowing tools and hardware products since they allow visual control of contents without having to pull them open.

Grâce aux tiroirs transparents les armoires Syncro permettent de ranger le matériel correctement, et offre la possibilité de contrôler visuellement le matériel.

The experience and know-how have led Syncro to launch a number of innovative ideas:

- 1.** High-quality durable plastic: does not lose its colour or become weak in time.
- 2.** Flat front surface with no jutting out parts to prevent damages and get an optimal space utilization.
- 3.** Automatic locking button.
- 4.** Modular design that fits perfectly other Syncro products.
- 5.** Robust metal frame.
- 6.** Contemporary design with flush handle.
- 7.** Can be provided with an aluminium divider (large size only)
- 8.** Optimal space utilization.

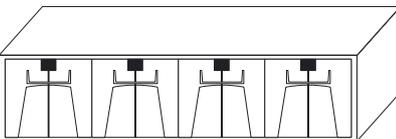

L'expérience Syncro a introduit une série d'innovations remarquables:

- 1.** *Matériel plastique de qualité élevée anti-vieillessement: il ne jaunit pas et ne devient pas fragile avec le temps.*
- 2.** *Façade plate sans partie saillante pour éviter tout dommage pendant l'usage et pour optimiser les espaces à l'intérieur de la camionnette.*
- 3.** *Bouton de fermeture automatique.*
- 4.** *Parfaite modularité avec les autres éléments Syncro.*
- 5.** *Corps métallique extérieur solide.*
- 6.** *Design moderne avec poignée incorporées.*
- 7.** *Uniquement pour les dimensions supérieures, possibilité d'introduire une cloison en aluminium.*
- 8.** *Exploitation maximum de l'espace.*

Comparison with traditional storage containers *Comparaison avec des Produits Traditionnels.*

Traditional storage containers
Boîtiers Traditionnels

Traditional storage containers are made with poor quality material, so that they turn yellow, fragile and break easily. Thanks to their high quality material and to their innovative design without jutting out parts, Syncro storage containers last for many years with no problem at all.

Les boîtiers Traditionnels sont réalisés avec des matériaux de qualité médiocre et donc se détériorent et jaunissent jusqu'à se briser très rapidement. Moyennant des matériaux très résistants et un design sans angle vif, les boîtiers SYNCRO garantissent un usage sans problème sur plusieurs années.

Examples

Exemples

Exemples

Examples

Cupboard units

Syncro cupboard units are provided with 2 doors, a locking mechanism with 2 bolts and a key lock. These cupboard units can be provided with a variable number of shelves. The taller models can be supplied with a clothes rail.

The upper part of taller models is tapered to follow the curves of van walls.

La partie finale des modèles plus hauts est biseautée, pour suivre la courbe des parois des fourgons.

Armoires

Les armoires Syncro sont équipées de 2 portes, avec un système de fermeture avec 2 verrous et serrures avec clé.
A l'intérieur elles sont équipées de rayons, dont le nombre peut varier.
Les modèles plus hauts peuvent être équipés de barre portemanteaux.

VAN STORAGE SOLUTIONS
AMENAGEMENTS POUR FOURGONS

Wheel housing covers / *Couvre-roues*

Wheel housing covers

Wheel housing covers are a key product in Syncro System program: mounted over the wheel arch, they are the base for installing all other Syncro System storage units and, at the same time, create additional storage space. As these covers can be closed at the rear, top or bottom they can be used to get additional storage space in any position inside the racking solution.

Les couvre-roues ont une fonction importante au sein du système Syncro: installés au-dessus du passage des roues, ils constituent la base pour l'installation des autres éléments du système Syncro, et en même temps ils constituent des compartiments de chargement utiles. Grâce aux différentes possibilités de fermeture sur la partie arrière, supérieure et/ou inférieure, il est en outre possible de les utiliser pour former des compartiments de chargement dans n'importe quelle position à l'intérieur de l'aménagement.

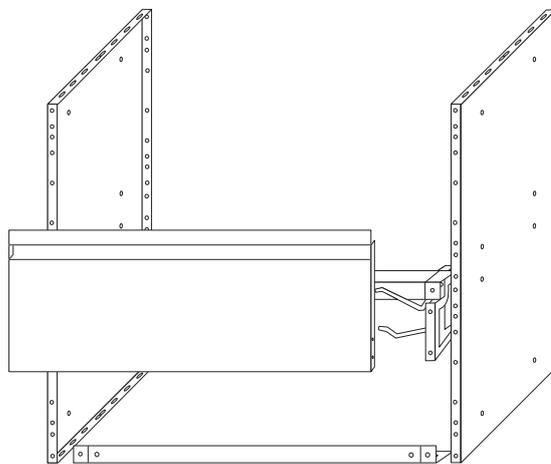

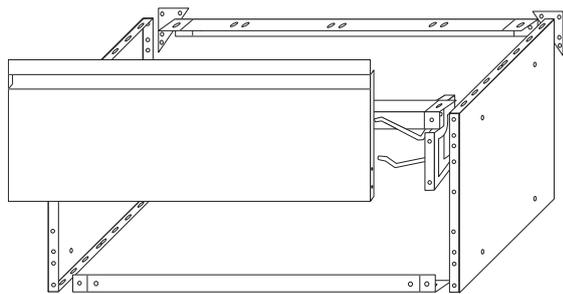

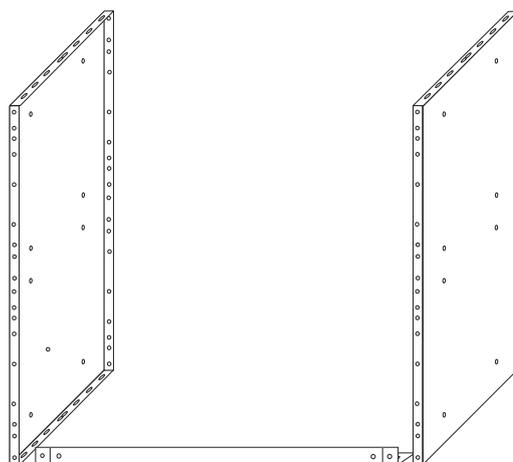

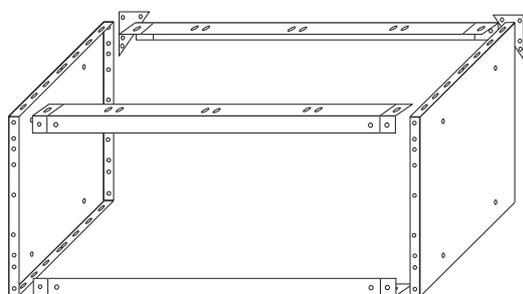

Couvre-roues

These wheel housing covers can be built also inside the higher side panels. In such a case, the rear reinforcement triangles plates are no longer required, the same is for the top angle part on wheel housing covers without door.

Les couvre-roues peuvent être également construits à l'intérieur des côtés plus hauts. Ceci rend superflu l'usage des triangles de renfort et, dans le cas de couvre-roues sans porte, même de la cornière supérieure.

Open wheel housing covers...

Open wheel housing covers consist of:

- A** - 2 side panels
- B** - 3 angle parts
- C** - 2 rear reinforcement triangles

In order to reduce weight, the bottom angle is less thick than the two on top.
The bottom angle can be either fixed or provided with a drop front.

Open wheel housing covers. This is the simplest model provided with three identical angle parts.

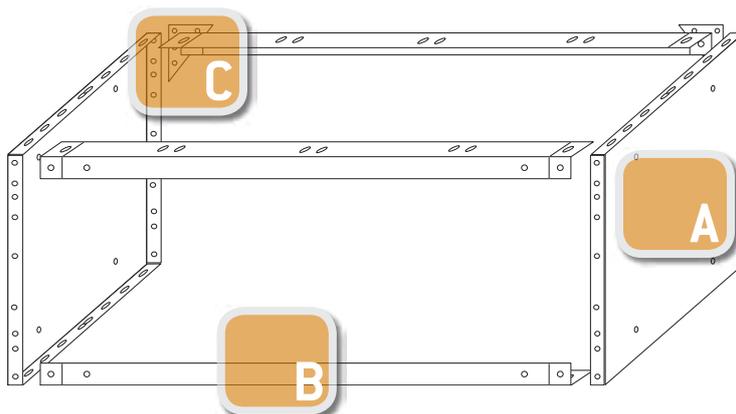

Couvre-roues ouvert. Le type de couvre-roues plus simple, avec trois cornières de même dimension.

Couvre-roues ouverts...

Les couvre-roues ouverts sont formés par des:

- A** - 2 flancs
- B** - 3 cornières
- C** - 2 triangles arrière de renfort.

Pour réduire les poids, la cornière inférieure est d'une épaisseur inférieure par rapport aux 2 supérieures.
La cornière inférieure est disponible fixe ou ouvrable, et peut ne pas être installée, ou être installée à l'arrière.

...with cut-to-size side panels for vans with non-standard wheel housing covers
...avec flancs découpés pour fourgons avec couvre-roues de forme particulière

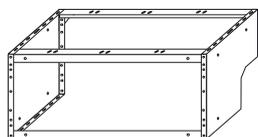

We also supply wheel housing covers with one of the two side panels cut-to-size to fit vans which have an elongated wheel housing such as:

- Citroën Berlingo - Peugeot Ranch/Partner
- Renault Kangoo - Nissan Kubistar
- Renault Master - Opel/Vauxhall Movano - Nissan Interstar
- Volkswagen Caddy 2003 - Volkswagen Transporter T5 2003

Des couvre-roues avec un des deux flancs découpés sont disponibles pour permettre l'installation dans les camionnettes qui ont les couvre-roues de forme allongée, comme:

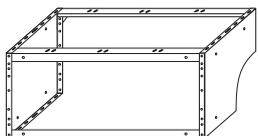

- Citroën Berlingo - Peugeot Ranch
- Renault Kangoo - Nissan Kubistar
- Renault Master - Opel Movano - Nissan Interstar
- Volkswagen Caddy 2003 - Volkswagen Transporter T5 2003

...for Berlingo - Ranch/Partner / ...pour Berlingo - Ranch

...with drop down front H. 130 MM
 ...avec bord ouvrable H. MM 130

The wheel covers with drop down front allow you to store bulky cargo securing it in place efficiently and safely.

The locking system consists of:

A - 1 key lock

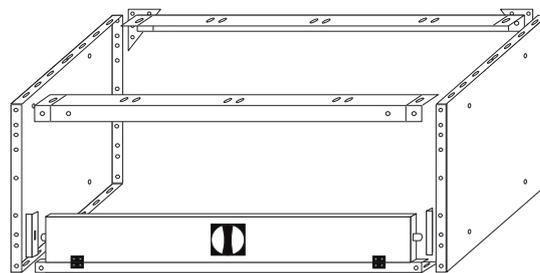

B - 2 locking bolts which lock the drop front on both sides

Les couvre-roues avec bord ouvrable permettent de ranger des objets même fort encombrants à l'intérieur du système Syncro, en les bloquant de façon sûre et efficace.

Le système de fermeture est muni de:

A - 1 une serrure avec clé.

B - 2 verrous qui bloquent la petite porte sur les côtés

Wheel housing covers with doors...

These wheel housing covers are provided with:

A - 1 door

The door is fitted with:

B - 2 parallelogram hinges with 2 gas springs

C - 1 synchronizing tube.

Door movement is safe and maintenance free.

Couvre-roues avec petites portes de fermeture...

Les couvre-roues peuvent être munis de:

A - 1 petite porte de fermeture.

La petite porte est munie de:

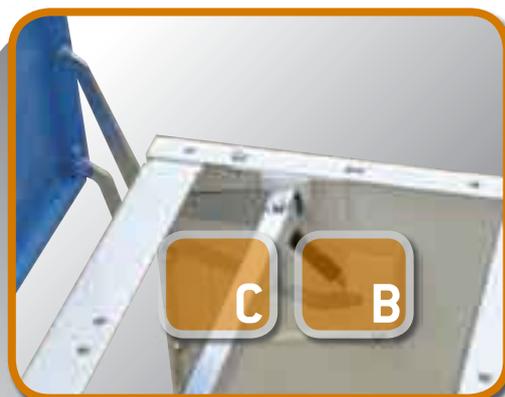

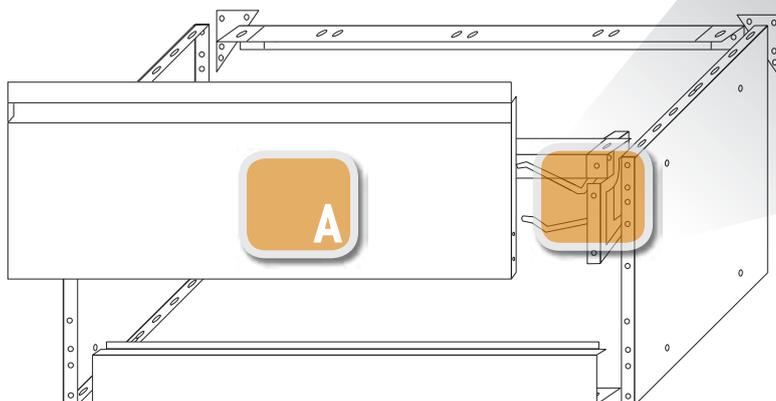

B - 2 charnières en forme de parallélogramme, avec 2 ressorts au gaz

C - 1 un tube de synchronisation intégré.

Le mécanisme est sûr et ne nécessite pas d'entretien.

You can see the advanced hinge system in the picture on the left: thanks to two gas springs the door is pushed downwards when closing and upwards when opening.

Sur l'image de gauche, on remarque le système de charnières sophistiquées: grâce à deux ressorts à gaz, la petite porte est poussée vers le bas quand elle est fermée et vers le haut quand elle est ouverte.

**...and drop front
...et cornière ouvrable**

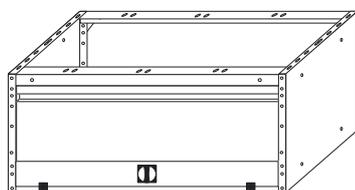

Drop front can be combined with the parallelogram hinge system allowing an almost complete opening. This is the ideal solution for stowing away bulky tools or hardware items quickly and securely.

La cornière ouvrable peut être associée à la fermeture en forme de parallélogramme du couvercle-roues permettant l'ouverture presque complète. De cette façon, on peut introduire des objets particulièrement encombrants et les ranger rapidement et sans danger.

Available only for 483 mm high models

Elle peut être appliquée uniquement sur les modèles d'une hauteur de mm. 483.

Rear and bottom closure panels for wheel housing covers

Fermetures arrières et inférieures pour couvre-roue

Both open wheel housing covers and with door are available also with bottom and rear panels. This solution is ideal for creating storage spaces above ground level.

Les couvre-roues, dans les versions ouvertes ainsi que ceux avec petite porte, sont disponibles avec fermeture inférieure et arrière. Cette variante permet de former des compartiments de chargement qui ne reposent pas sur le plancher de la camionnette.

To close off an additional rear angle is installed together with a closure panel, this can be fitted to the top, bottom or rear of the wheel housing cover, depending on requirements.

La fermeture s'obtient en appliquant une cornière arrière et, en fonction des nécessités, les fermetures au-dessus, en dessous ou sur la partie arrière.

Top and bottom closure panels for wheel housing covers

Tool box secure system

Syncro tool box secure system can be installed on open wheel housing covers. The grip shuttle moves in one direction only. Once it comes in contact with the tool box, this system secures the tool box in place. By turning the rear flywheel, the disc is further tightened up against the tool box for additional safety. To release simply press the locking lever.

It is also possible to install two grip shuttle systems inside the same wheel housing cover.

Tool box secure system kit

Each kit consists of:

- a rail
- grip shuttle
- side panel

Le dispositif de fixation des valises Syncro s'utilise à l'intérieur d'un couvre-roue ouvert. La navette se déplace dans une seule direction. Quand elle entre en contact avec les valises, elle se bloque automatiquement. On peut serrer ultérieurement le disque au moyen du levier arrière. Pour débloquer, il suffit d'appuyer sur le levier de déblocage.

On peut également utiliser deux navettes à l'intérieur du même couvre-roue.

Kit de fixation des valises

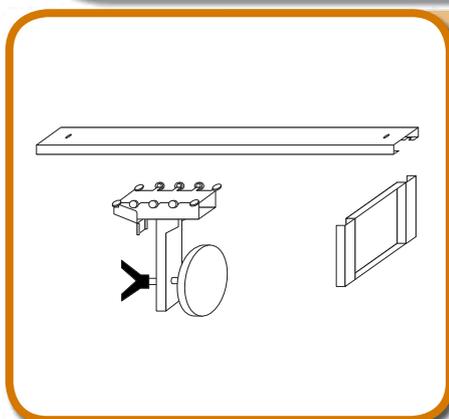

Chaque kit comprend:

- un rail
- une navette de blocage
- un contre-flanc

Dispositif de fixation des valises
